

\$170.00

Kitty Wellness

TOTAL SAVINGS OF \$165.35

Our kitty Wellness program is a great way for you to save on your kitten's full series of vaccines. The package is the perfect way to start your new kitten's path of health and happiness!! Kitten vaccinations should be given at 8 weeks, 12 weeks and 16 weeks of age.

WHAT'S INCLUDED

A kitten's first set of vaccines are a series of boosters to protect your kitten from harmful disease. Vaccines include FVRCP, Rabies, and Feline Leukemia (both indoor/outdoor kittens). In addition, we deworm your kitten twice. All kittens should be tested for feline Leukemia and feline AIDS; we will do this as part of our kitten wellness program. There are a total of three wellness visits about one month apart to complete the program. Your kitten will receive an exam at each visit and we will discuss the kitten's growth and progress with you. If there are additional tests, treatments, or medications required there will be an additional cost to you.

Spay your female kitty by 7 months of age or neuter your male kitty at about 9 months and you will receive a 10% discount on the surgery.
